

We are all but mere Vertices of the Graph Universe

Searching for Edges to connect with each other

If we're not connected in this Universe,

We're connected in the Complementary Parallel Universe

We are all but mere Groups

— We need Closure

We want to be Associated to positivity

We're discovering our Identity

We have a dark Inverse personality hidden in our shadows

But in the end,

We're Commutative, we're all equals

Space is the Universal Upper Bound

And we're all its Atoms.
